1. Summary

Metric	All suites (unit + system + perf)	Unit tests only
Statements	2014	2014
Statements covered	2014	2010
Statement coverage	**100.00 %**	99.80 %
Combined (statement + branch) coverage	99.92 %	99.62 %
CI quality gate	≥ 90 % (`--cov-fail-under=90`)	

Tool: coverage.py (via pytest-cov) with branch measurement enabled. Excluded: `vps/__main__.py` (CLI wrapper, exercised as a subprocess by the performance suite) and lines marked `# pragma: no cover` (defensive branches that cannot be reached through the public API, e.g. after a MAC has already been verified).
